

MY POWER SMART!

We asked Manitobans:

The Manitoba government plans to replace Manitoba Hydro's Power Smart program with a new agency responsible for energy efficiency programs. The government says Manitoba Hydro's role selling power should be separate from the role of conserving it. Others say Manitoba Hydro should continue to manage Power Smart because it has been doing a good job for 25 years and the program is already well-known. What do you think? Should the government...
